Real time content in the cloud

Solventum™ Grouper Plus Content Services

You might say Solventum wrote the book on classification methodologies

You wouldn't be wrong

Here are some examples of our best work:

- Solventum™ All Patient Refined Diagnosis Related Groups (APR DRGs) Classification System

- Solventum™ Enhanced Ambulatory Patient Groups (EAPGs) Classification System

- Solventum™ Clinical Risk Groups (CRGs) Classification System

- Ambulatory Payment Classifications (APCs)

- Centers for Medicare & Medicaid Services (CMS) DRGs

- TRICARE

- Outpatient medical necessity content

- Preventable readmissions and complications

- Risk-adjustment methodologies for population health

- Inpatient and outpatient content for numerous state Medicaid agencies, commercial payers and federal reimbursement packagesthe revenue cycle. Although these efficiencies are beneficial, practices still need to monitor the accuracy of the codes they assign. Without continual monitoring, practices could experience the negative consequences of decreased revenue and an increase in denials and audits.

Solventum drives the standards with more than 35 years of experience

Our story stands because of

- A strong clinical history

- The most comprehensive proprietary grouping and preventable events software portfolio on the market

- Both industry standard (public) and industry accepted (proprietary) methodologies

- A long history and deep experience with ICD-10

- Flexible delivery options, including cloud-based access

- Unmatched service and support

Right now, 87 percent of the hospital market depends on Solventum coding, classification and medical necessity experience. Why?

No one invests more in R&D for our staff of economists, clinical professionals, nosologists and medical necessity specialists.

Our depth and knowledge translates to convenience for our business partners and their customers.

Solventum Grouper Plus Content Services (GPCS)

With so many options to license with Solventum, you can easily meet the inpatient and outpatient processing needs of your users, including hospitals, ambulatory care providers and facilities, payers, fiscal intermediaries, state and federal agencies.

What's one of the easiest ways to access our content and methodologies?

Our cloud-based delivery mechanism: Solventum GPCS

Today, more than 83% of the health care industry is using the cloud for their business operations.

Learn more

Why a cloud-based option?

Several reasons. Ok a lot of reasons

Business agility

- Dramatically reduces cost of ownership with lower labor and maintenance requirements

- No hardware to install

- Gives you great transparency into your operations

### Solid performance quality, consistency and access to real time content

- Dynamic auto scaling means reliable processing capabilities

- Immediate access to content including multiple versions of groupers and code sets

- One interface for your grouping, reimbursement and editing needs

Secure and HIPAA compliant?

Of course. Solventum follows strict protocols for data authentication, transfer and encryption.

How does Solventum GPCS work?

Vendor applications

- Patient financial services
- Analytics
- Compliance
- Patient access/scheduling

- Security and administration layer (Oauth for REST)
- Industry-standard protocol (RESTful APIs available)
- Web services interface

Solventum quickly makes core regulatory changes as they occur and maintains regulatory data and logic. With cloud technology, new content releases don't interrupt work flow or require interface changes.

Content

- Inpatient grouping and editing
- Outpatient grouping and editing
- Reimbursement
- Preventables and population health grouping
- Medical necessity

A little more about Solventum GPCS performance

We add and remove capacity as needed. The virtual server-based environment grows or shrinks in processing power with queue based auto scaling.

We boost our response time during periods of heavy usage and offer revved up performance times when running long batches.

Concerns?

Here's what we hear consistently

- How reliable is a hosted solution? How can I be assured that Solventum GPCS will keep up with my volume?

- Will a cloud-based system make me more vulnerable to security/HIPAA concerns?

- Why should I license public content through Solventum?

- Will Solventum keep up with regulatory changes?

- I've licensed one grouper. What else do you have?

We've got answers

No surprises. We offer stable performance with no scheduled downtime. Our service level agreement (SLA) includes guarantees for performance and costs and seamless delivery within your software.

Safeguards and security. Absolutely. Protection of your data is our top priority. HITRUST and SOC-2 certified. We follow strict NIST standards for authentication using oAuth (REST), 256-bit encryption, most secure level of TLS (transport layer security) over HTTPS. Your data is encrypted in transit with no PHI stored in the cloud. Solventum GPCS is HITRUST and SOC-2 certified.

Ready made content that is faster to market. We are the vendor of choice for CMS and numerous Medicaid agencies and commercial payers for regulatory/payment content. We deliver up to date regulatory data and logic, as well as content for population health measurement.

Our expertise and reputation. We've made our name based on the quality and consistency of our Solventum clinical and economic research team, our dedicated medical necessity staff, support specialists, registered nurses and the Solventum nosology team.

Market responsiveness. Reliable, timely updates. Always.

Choose wisely

Choosing the right cloud computing content partner gives you the control to respond quickly to industry demands.

As a Solventum customer, you get the up to date regulatory data and logic you need, maintained and supported by Solventum Health Information Systems and our 30+ years of experience and expertise in editing, grouping and reimbursement methodologies.
