

Stronger. Faster

It's time to aim for the gold

Finish posterior restorations faster and easier with 3M™ Ketac™ Universal Aplicap™ Glass Ionomer Restorative

You're not the type to rest on your laurels. You're always looking for opportunities to improve patient satisfaction and enhance the productivity of your practice. We share those goals. That's why we're pushing the limits of speed and strength with each new generation of glass ionomer materials.

3M™ Ketac™ Silver Aplicap™/Maxicap™ Glass Ionomer Filling Material helped get you in the race. Now, it's time to set a new pace. Ketac Universal Aplicap restorative can help you create stronger, more esthetic restorations in fewer steps—so you can cross the finish line faster.

Silver is good, but why not go for gold?

Ketac Silver Aplicap filling material offers a lot, but Ketac Universal Aplicap restorative gives you even more:

- Low stickiness allows an easy placement
- Better esthetics for a more natural-looking finish
- Faster procedure with fewer steps
- Extended indications for use compared to other glass ionomer materials

Take your glass ionomer restorations to the next level with new 3M™ Ketac™ Universal Aplicap™ Glass Ionomer Restorative

We've set a new record in speed, strength and simplicity!

Ketac Universal Aplicap Glass Ionomer Restorative

Ketac Silver Aplicap/Maxicap Glass Ionomer Filling Material

You've covered a lot of ground with 3M™ Ketac™ Silver Aplicap™/Maxicap™ Glass Ionomer Filling Material. With this glass ionomer on your team, you've created core build-ups and larger scale restorations with high patient satisfaction.

Now, there's a stronger, faster contender in the field: Ketac Universal Aplicap Glass Ionomer restorative.

This versatile, next-generation glass ionomer is designed for a simple and speedy procedure, with easy placement and no need for conditioning or light-curing. Ketac Universal Aplicap restorative is strong enough to use for long-term and restricted stress-bearing indications.* Plus, it sets the gold standard for compressive strength and surface hardness without a coating. That means you can deliver great restorations, reduce chair time and keep your day on track.
